PLAYING THE GAME

Blackjack Switch is a variation of blackjack played with eight standard decks that allows the player to switch cards between their two hands. To play, the player must make two identical bets and is dealt two blackjack hands. After receiving the first two cards on each of their hands, the player will have the option whether he/she wishes to 'Switch' or not.

The player will respond by giving a switch hand signal. Only the dealer can 'Switch' the cards, if applicable. Blackjacks are not paid immediately. A player with a blackjack hand, is given the option to take EVEN money or to switch their cards. The dealer will then play out his/her hand following the casino blackjack procedures, however, if the dealer makes a total of 22 then all players' remaining bets are pushed, including a guest's non blackjack hand total of 21 which too is pushed.

Insurance Bet (only if Dealer shows a up card of an ACE)

- Option to bet up to half the original wager. Winning insurance wager pays 2:1

Double Down Bet

- Option to bet up to 100% of the original wager and then the player will only receive one addition card.

Splitting

- Pairs may be split, making two hands, up to three (3) times; Aces may only be split once.

All other casino blackjack rules apply.

Blackjack Switch offers an optional side bet called the Super Match. The super match wins when the combination of the four cards from the player's two hands has a matching pair or better. The pay table for the Super Match is as follows:

Matched Cards	Payoff
One Pair	1 to 1
Three-of-a-kind	5 to 1
Two Pairs	7 to 1
Four-of-a-kind	50 to 1
